E-commerce dataset by Olist (SQLite)

The Brazilian e-commerce dataset by Olist as an SQLite database file

[Data Card](#) [Code \(14\)](#) [Discussion \(1\)](#) [Suggestions \(0\)](#)

About Dataset

I imported the two Olist Kaggle datasets into an SQLite database. I modified the original table names to make them shorter and easier to understand. Here's the Entity-Relationship Diagram of the resulting SQLite database:

E-Commerce Data

Actual transactions from UK retailer

Data Card

Code (409)

Discussion (11)

Suggestions (0)

About Dataset

Context

Typically e-commerce datasets are proprietary and consequently hard to find among publicly available data. However, [The UCI Machine Learning Repository](#) has made this dataset containing actual transactions from 2010 and 2011. The dataset is maintained on their site, where it can be found by the title "Online Retail".

Content

"This is a transnational data set which contains all the transactions occurring between 01/12/2010 and 09/12/2011 for a UK-based and registered non-store online retail. The company mainly sells unique all-occasion gifts. Many customers of the company are wholesalers."

Acknowledgements

Per the UCI Machine Learning Repository, this data was made available by Dr Daqing Chen, Director: Public Analytics group. chend '@' Isbu.ac.uk, School of Engineering, London South Bank University, London SE1 0AA, UK.
